

# von ICD-10 zu ICD-11

Josef E. Brandenberg  
Präsident der FMCH

# ICD in der Orthopädie und Chirurgie

Wer braucht ICD?

- Codierer
- Gutachten – immer mehr Versicherungen verlangen ICD
- Zukünftig im elektronischen Patienten-Dossier EPD

# Was ist neu bei ICD-11

---

- Vor allem Psychiatrie betroffen, div. «neue Krankheiten»
- Bewegungsapparat: siehe Vortrag Jörg Jeger
- Chronische Schmerzsyndrome

# Fall-Beispiel

---

- 43-jähriger Bauarbeiter stürzt von der Leiter
- Rechter Fuss: Frakturen Naviculare, Cuboid, Calcaneus-Vorderhorn
- Linker Fuss: Frakturen Lisfranc 1. bis 4 Strahl, Basis Metatarsale I

# Fall-Beispiel

---

- Rechter Fuss:      Konservative Behandlung mit Gips
  
- Linker Fuss:      Draht-Spickung   Lisfranc Platten-Osteosynthese  
Metatarsale I

# Fall-Beispiel

---

- Rechter Fuss: ossäre Heilung mit Arthrose des Chopart-Gelenkes
- Linker Fuss: ossäre Konsolidation, CRPS

# Fall-Beispiel

---

- Kapitel 22: Frakturen
- Kapitel 15: Arthrose des Chopart
- Kapitel 08: CRPS

# ICD-11 for Mortality and Morbidity Statistics (Version : 04 / 2019)

### Description

Osteoarthritis (OA) can be defined as a group of distinct, but overlapping diseases, which may have different etiologies, but similar biological, morphological, and clinical outcomes affecting the articular cartilage, subchondral bone, ligaments, joint capsule, synovial membrane, and periarticular muscles. OA is the most common joint disease in persons 65 years of age and above. Its etiology is not fully understood, although there are several related factors, such as female gender, genetics, metabolism, and excessive mechanical stress. The diagnosis of OA is primarily based on clinical history and physical examination. The cardinal radiographic features of OA are focal/non-uniform narrowing of the joint space in the areas subjected to the most pressure, subchondral cysts, subchondral sclerosis, and osteophytes.

# Chopart-Arthrose

---

- Kapitel 15: Osteoarthritis (Arthrose)
- FA 03: Osteoarthritis of other specified joint.
- FA 03.1: posttraumatic OA of other specified joint.
- XA4JJ1: Calcaneo-cuboid joint

# Lisfranc-Fraktur

---

- Kapitel 22: Injury, poisoning and other consequences of external causes
- ND13.3: fracture of metatarsal bone
- 27 Untergruppen: XJ69V: dislocated fracture.

# Lisfranc-Fraktur

---

- Auf Wunsch: wahlweise rechts, links, bilateral
- Zusätzlich: offene oder geschlossene Fraktur

# CRPS

---

- Kapitel 08:           Deseases of the nervous system
- 8d8A.0:            Complex regional pain syndrom
- 8D8A.00:           Complex regional pain syndrom Typ I
